North American River Otter Mask

North American River Otters Facts:
The EcoTarium has two resident river otters, a male and female, named Slydell and Daisy. You can often find them swimming in their nearly 3,300 gallon pool or sleeping together in their shelter.

- River otters eat a variety of foods, including fish, amphibians, rodents, small birds, eggs, crustaceans, and shellfish.
- River otters can close off a small valve in their ears and nose when swimming, which helps to keep water out.

Materials
Crayons/Markers/Colored Pencils
Scissors
1 Foot String or Ribbon

Instructions
*Adult help may be necessary!
Step 1: Color and cut out the otter mask
Step 2: Cut out eye holes and holes for the string/ribbon
Step 3: Tie the string/ribbon on each end of the mask
