

# Striped Skunk Activity Sheet

Two skunks live at the EcoTarium, named Stormy and Misty. While they mostly live in their Animal Corner habitat, they will sometimes come out for educational programs as well!

## Did You Know

- Skunks are opportunistic omnivores and will eat bugs, grubs, seeds, nuts, roots, vegetables, fruits, eggs, or even human garbage. They have long claws to help them dig and find food.
- Skunks can spray a foul odor up to 16 feet to help defend themselves against their many predators.
- Skunks are nocturnal, which means they mostly sleep during the day and wake up at night to look for food.
